| Project Entity                       | Manaus Ambiental S.A.  |  |  |
| Project Context  Project Description | Manaus is a growing industrial city in the north-western state of Amazonasin Brazil. While access to water infrastructure is available to 98 per cent of the city's residents, access to wastewater infrastructure is rather low and available only to 26 per cent of the population. The existing infrastructure has not kept pace with the recent accelerated urban growth in the city, especially in the areas occupied by the poorest segments of the population, and requires significant investments in its modernization and expansion.  The Project comprises the following components: 1. Expansion             |  |  |
| Troject Beschption                   | and improvements in the water infrastructure; 2. Expansion and improvements in the wastewater infrastructure; 3. Loss reduction; and 4. Operational efficiency, security, and other investments  |  |  |
| Project Objective                    | The Project aims at rehabilitating or developing water and wastewater infrastructure in Manaus to guarantee access to reliable and affordable water and wastewater services for the population; improving public health and reducing water-borne diseases; and ensuring compliance with environmental standards.  The key benefits of the Project include: (i) improved quality of water services for the citizens with a greater number of households connected to the water network; (ii) reduction of untreated effluent or improved quality of wastewater discharged into the Amazon River basin; and (iii) improved |  |  |

|                             | 1   |                     |                       |  |
|-----------------------------|---|---------------------|-----------------------|--|
|                             | condition and quality of underground water and soil by connecting more households to the sewage network.  |                     |                       |  |
| Implementation Arrangements | The implementation period of the Project is 2022-2027   |                     |                       |  |
| Environmental               | The Project has been categorized as Category B in line with the   |                     |                       |  |
| and Social Information      | NDB's Environment and Social Framework, with an environmental and social risk tier of B-2 'Medium Risk'. Main E&S impacts will be addressed and mitigated by implementing relevant E&S management plans as per the country system, the Borrower's Environmental and Social Management Systems, and additional measures for the Project agreed with NDB and reflected in the Environmental and Social Impact Management Plan |                     |                       |  |
