

## <u>Project Summary for Public Disclosure</u> (after approval of NDB financing)

| Project Name                   | Integrated Sewerage System for city of Imphal (Phase II) Project  |  |  |
|--------------------------------|---|--|--|
| Country                        | The Republic of India   |  |  |
| Туре                           | Sovereign   |  |  |
| Area of Operation              | Water & Sanitation  |  |  |
| Concept Approval Date          | 14 December 2021  |  |  |
| Financing Approval Date        | 26 October 2023   |  |  |
| Total Project Cost             | INR 12.5 billion  |  |  |
| Initial Limit of NDB Financing | USD 115 million   |  |  |
| Current Limit of NDB Financing | USD 115 million   |  |  |
| Borrower                       | The Republic of India   |  |  |
| Project Entity                 | The Government of Manipur   |  |  |
| Project Context                | Imphal metropolitan area is the largest urban area in the state of Manipur. The city has been experiencing rapid growth not adequately supported by the respective urban infrastructure, including sanitation facilities. Currently, only 11 municipal wards (areas) of Imphal out of 27 are covered by a sewered sanitation system. In other areas, households rely on use of septic tank facilities for sanitation purposes. In the absence of a sewered sanitation system, wastewater generated in these wards gets discharged into Imphal and Nambul rivers through open drains. As a result, water quality in the drainage network as well as in the receiving river segments is unacceptable as per the Central Pollution Control Board water standards. The Project is essential to address the issues of inadequate sanitation coverage and river pollution, and to improve the quality of life of residents of Imphal. |  |  |
| Project Description            | The Project will develop and upgrade the existing sanitation system of the city and adjacent peri-urban areas through construction of sewerage treatment plants, sewerage pumping stations and a network of sewer pipelines, and thus provide sewerage services in areas of Imphal not yet covered by sewered sanitation system.  The Project includes Information, Education and Communication activities to increase awareness among the population about the significance of sewerage system as a safe and hygienic way of disposing wastewater, augment readiness to pay monthly tariff for contributing towards sustainable O&M  |  |  |

| of   | the sewerage system, and ensure overall improved citizen   |  |  |  |
|--|--|--|--|--|
|  | articipation and ownership.  |  |  |  |
| Th<br>de<br>sys  | ne Project also includes capacity building activities, such as eveloping a detailed GIS based network map of sewerage stem, trainings for sanitation workers and supervisory staff, and strengthening laboratory testing capabilities.   |  |  |  |
| Im be riv (10 to an ins sai Th Su Sai an wir aff   | ne Project aims to provide integrated sanitation services in aphal, which will improve quality of life of residents through etter hygiene conditions and enhance water quality of Imphal yer. The Project will result in enhanced sanitation coverage 00% household access to sanitation system in Imphal) leading improved health and hygiene of residents; reduced pollution and increased conservation of Imphal river; and enhanced stitutional capacity in the State to provide water and initation services.  The Project will primarily contribute to United Nations installation, specifically target 6.2 (achieve access to adequate and equitable sanitation and hygiene for all). It is also aligned ith SDG 3 Good Health and Wellbeing through its cascading fects. |  |  |  |
| Go<br>im<br>De   | ne Project is estimated to be implemented over 4 years. The overnment of Manipur will be the Project Entity and will inplement the Project through its Public Health Engineering epartment. Contractors for the Project will be selected rough a competitive and transparent bidding process.  |  |  |  |
| Environmental Th   | ne Project has been classified as Category B in accordance   |  |  |  |
| The are discompressions of the property of the | with the NDB Environment and Social Framework.  The main E&S risks arise from excavation of roads in the urban area of the city to lay sewers and the associated traffic disruptions, interruptions of municipal utilities and businesses, occupational and public safety during construction, and odor problems from pumping stations and sewerage treatment plants during operation.  These impacts and risks will be mitigated by implementing the E&S Management Plans and the E&S Impact Management Plan prepared for the Project.  |  |  |  |
|  | ne Project will be financed through loan from NDB and bunterpart funding from the Government of Manipur.   |  |  |  |
|  | Source of Fund Amount  |  |  |  |
|  | DB USD 115 million   |  |  |  |

|          | The Government of Manipur |                     | INR 3,421 million  |
