

Project Summary for Public Disclosure
(after approval of NDB financing)

Project Name	Water Supply and Sanitation Program in Russia
Country	The Russian Federation
Type	Non-Sovereign
Area of Operation	Water & Sanitation
Concept Approval Date	12 May 2020
Financing Approval Date	29 September 2020
Total Project Cost	USD 170 million
Initial Limit of NDB Financing	USD 100 million
Current Limit of NDB Financing	USD 100 million
Borrower	Eurasian Development Bank
Project Entity(ies)	Eurasian Development Bank
Project Context	Russia is endowed with one-fifth of the world’s fresh water resources, however, faces challenges with discharge of untreated wastewater into its water bodies. The majority of the water supply and sanitation systems in the Russian Federation were constructed during the 1970s to 1980s and due to physical and technological wear, require replacement or modernization. The current state of water supply and sanitation infrastructure has an adverse impact on the environmental situation in the country. With the target to enhance the quality of water supply and sanitation facilities, the Government of the Russian Federation (GoRF) has adopted the National Project “Ecology” which is aimed at pollution abatement in Russia.
Project Description	The proposed NDB loan through the modality of a two-step loan will be used by Eurasian Development Bank (EDB) to finance water supply and sanitation sub-projects meeting selection criteria agreed with NDB.
Project Objective	The Program is aimed at improving environmental protection across Russia as set out in the National Project “Ecology” through reconstruction of water supply and sanitation facilities in different regions of the country.
Implementation Arrangements	The Program is to be implemented over four years between 2020 and 2024. It is expected that most sub-projects will be implemented by public entities, following mandatory procurement requirements as per the country system

Environmental and Social Information	The Program is Category “FI-B” in line with NDB’s Environmental and Social Framework (ESF). The sub-projects are likely to be Category B due to moderate environmental and social (E&S) impacts and risks that will be mitigated by adherence to the country systems. For sub-projects with significant E&S impacts and risks, including Category A, financing of such sub-project needs to be approved by NDB.
