1. Overview

1.1 Type of procurement: open bid

1.2 Purpose of procurement

The main scope of work of operation and maintenance consultancy is to provide professional consulting service for pre-operation planning, operation preparation, overall planning, establishment of operation system, personnel training, system safety assessment, operation evaluation, operation optimization, operation management and operation system documentation; to provide support to manning, organizational structure setup and hands-on operation; to assist Huangshi tram operation company in improvement of operation preparation plan and scheme; to sort out and solve problems existing with operation preparation to carry out and complete various operation preparation work so as to ensure start of operation of the tram line on time and in high quality; to ensure that the

operation company of Huangshi tram line will achieve the goal of independent operation of the tram line before the expiration of the consultancy service. Hence, the transformation from “blood transfusion” to “blood making” is realized. At the end of the service, the consultancy service provider should have trained for the tenderee an operation team with a reasonable personnel structure, standardized organizational structure, complete rules and regulations, and efficiency of management.

1.3 Source of Financing: NDB loan

1.4 Bid Evaluation Method: Comprehensive Method

1.5 Project Briefing

The Project aims to improve the urban transportation facility and management service; improve people’s travel and living conditions; facilitate investment with improved environment; and to upgrade city image of Huangshi.

The project starts at Huangshi Avenue – Mining Museum Station, with a total length of 27km and total number of 30 stations, a depot in Baihua Road, where dispatching center is located. The project takes a total investment of RMB 4.57 billion yuan.

Tender control price: RMB9.48 million yuan inclusive of a tentative amount of RMB3.38 million intended to cover the driver and dispatching personnel training so as to obtain operation license, as well as the cost of accommodation, travel and living expenses during training; this is not to be adjusted at the time of bidding, but will be settled against actual amount during project implementation. Bidding price shall not be higher than tender control price.

Term of service: expected to be 20 months, from October 2021 to June 2023 (6 months after trial operation).
