

Request for Proposal Notice

Name of Assignment: Construction Service of Public Oriented Bus Mobile Travel Service System

RFP Reference No.: WKZB2226NXG401339

Loan No.: 19CN03

Contract No.: CS-9

Country: The People's Republic of China

Date: Aug 17th, 2022

1. The People's Republic of China (hereinafter called "Borrower") has received financing from the New Development Bank (the "Bank") in the form of a "loan" (hereinafter called "Loan") toward the cost of Ningxia Yinchuan Integrated Green Transport Development Project. Project Implementation Agency Yinchuan Municipal Transport Bureau (hereinafter called "Client"), intends to apply a portion of the proceeds of this loan to eligible payments under the contract for which this Request for Proposals is issued. Payments by the Bank will be made only at the request of the Yinchuan Municipal Transport Bureau and upon approval by the Bank, and will be subject, in all respects, to the terms and conditions of the loan agreement. No party other than the Borrower shall derive any rights from the loan agreement or have any claims to the proceeds of the loan.
2. The Client now invites proposals to provide the following consulting services (hereinafter called "Services"): **Construction Service of Public Oriented Bus Mobile Travel Service System.**

2.1 Project overview: The first phase of the project has completed the infrastructure of the traffic command center, completed the software and hardware support systems such as private cloud, data exchange platform and geographic information platform, and laid a good foundation for the subsequent application system construction.

The construction of Travel Service System of this project includes two parts: the official website and the customized bus system.

a) Official Website

Through the construction of a public oriented public transport system portal system, on the one hand, it will provide the public with a display window of enterprise

dynamics, style and innovation. On the other hand, it provides the query function of routes information, transfer information and operating vehicle information, and timely releases the information release function of relevant changes of bus routes, stations and hubs.

b) Customized Bus System

The customized bus system will be built to collect the travel needs sent by passengers through mobile phones, official websites, hot-lines and other channels. Through big data analysis, special public transport services will be provided for passengers with similar needs such as starting point, travel time and destination. Achieving online registration, new route application, charge management, operation dispatching and other functions, information sharing and real-time communication, and meet the needs of passenger travel information service; Achieving the customized bus travel mode of "one person one seat, online ticket purchase and intelligent ticket inspection", and build a passenger travel information service platform with the customized bus management system as the core. Help Yinchuan bus extend the service function of customized shuttle bus project and improve the comprehensive competitiveness of the enterprise.

c) System Software Test and Security Classified Protection Test

- (1) Conduct the third-party test on customized bus system and official website, and the test report is used as the basis for project acceptance.
- (2) Conduct the security classified projection test on customized bus system, two tests shall be conducted within the service period.

2.2 Service period: the system construction shall be completed within six months from the effective date of the contract, the trial operation and the final acceptance shall be completed within three months, and the operation and maintenance warranty service shall be provided for five years from the date of final acceptance. In accumulation of 36 person-months.

2.3 Scope of bidding: provide the Client with construction service of Public Oriented Bus Mobile Travel Service System, including but not limited to: official website, customized bus system and related system software test, security classified projection test, and etc.

2.4 Project sites: Place designated by the Client.

More details on the Services are provided in the Terms of Reference (Section 7).
