If the cost per unit of quantity changes, or if the nature or timing of the work in the Variation does not correspond with items in the Bill of Quantities, the quotation by the Contractor shall be in the form of new rates for the relevant items of work. If the Contractor's quotation is unreasonable, [or if contractor fails to provide the Project Manager with a quotation within a reasonable time specified by Project Manager in accordance with GCC38.2] the Project Manager may order the Variation and make a change to the Contract Price, which shall be based on the Project Manager's own forecast of the effects of the Variation on the Contractor's costs If the Project Manager decides that the urgency of varying the work would prevent a quotation being given and considered without delaying the work, no quotation shall be given and the Variation shall be treated as a Compensation Event. If the PCC does not include a table of adjustment data this sub clause shall not apply and there shall be no price adjustment. (a) The price adjustment according to sub para (d) below, shall apply for the work done from the start date given in the PCC up to the end of the Intended Completion Date. 	$R_{sn} = (V_{sn} + S_{sn})$ minus (amount of secured advance recovered in the same period + value of works executed under variations for which price adjustments will be worked separately based on terms mutually agreed between the Project Manager and the Contractor) where, V_{sn} is the total value of work done during the specified period, and S_{sn} is the secured advance paid during the specified period, (d) The adjustment to be applied to the amount otherwise payable to the Contractor, as valued in accordance with the Price Schedule and certified in Payment Certificates, shall be determined from formulae which shall be of the following general type: $P_n = a + b \frac{L_n}{L_o} + c \frac{E_n}{E_o} + d \frac{M_n}{M_o} + \dots$ Where, “P_n” is the adjustment multiplier to be applied to the value of the work done during the period “n”, this period being a month unless otherwise stated in the PCC. “a” is a fixed coefficient, stated in the relevant table of adjustment data, representing the non-adjustable portion in contractual payments; “b”, “c”, “d”, are coefficients representing the estimated proportion of each cost element related to the execution of the Works, as stated in the relevant table of adjustment data; such tabulated cost elements may be indicative of resources such as labour, equipment and materials; “L_n” [Labour], “E_n” [Equipment], “M_n” [Material], Are the current cost indices or reference prices for period “n”, each of which is applicable to the relevant tabulated cost element [Labour, Equipment, Steel, Cement, Fuel/Lubricants, Bitumen, others] on the date, specified in the Table-2 of Adjustment Data, prior to the last day of the period (to which the particular Payment Certificate relates); and “L_o”, “E_o”, “M_o” Are the base cost indices or reference prices, expressed in the relevant currency of payment, each of which is applicable to the relevant tabulated cost element on the Base Date. (c) The cost indices or reference prices stated in the tables of adjustment data given in PCC shall be used. The base date shall be the deadline for the submission of bids.
--	--

	(d) If the Contractor fails to complete the Works within the Intended Completion date, adjustment of prices thereafter shall be made using either: (i) index or price applicable for each cost element tabulated in the tables of adjustment data on the specified date prior to the expiry of the Intended Completion Date, or (ii) The current index or price applicable for the period in question whichever is more favorable to the Employer. (e) The weightings (coefficients) for each of the factors of cost stated in the table(s) of adjustment data shall only be varied by the Project Manager if they have been rendered unreasonable, unbalanced or inapplicable, as a result of Variations. (f) Unless otherwise stated in the P.C.C., the Price adjustment shall be done in each monthly Interim Payment Certificate [IPC]. The coefficients and indices are given in the Tables of Adjustment Data in Contract data. To the extent that full compensation for any rise or fall in costs to the contractor is not covered by the provisions of this or other clauses in the contract, the unit rates and prices included in the contract shall be deemed to include amounts to cover the contingency of such other rise or fall in costs

Labor Influx and Construction Workers Camp Management Plan

During implementation phase, worker population is likely to influx in the project area. Management of this labour influx and of issues related to the labour campsite is a critical part of environmental and social management of the project. To address the probable impact due to labour influx, and establishment of labour / workers camp, a detail camp management plan is prepared to minimize and mitigate the environment and social impact.

Contractor's Responsibility to Manage Labour Influx

As a part of Contractor's ESHS-MSIP, the contractor, within 14 days from the delivery of the Letter of Acceptance, shall prepare and submit Labour Influx and Workers' Camp Management Plan to the Project Manager that addresses specific activities that will be undertaken to minimize the impact on the local community, including elements such as workers' code of conduct, training programs on HIV/AIDS, etc. A Workers' Camp Management Plan addresses specific aspects of the establishment and operation of workers' camps

This Labor Influx and Worker's Camp Management Plan will include:

- (i) mandatory and repeated training and awareness raising for the workforce about refraining from unacceptable conduct toward local community members, specifically women;
 - (ii) informing workers about national laws that make sexual harassment and gender-based violence a punishable offence which is prosecuted;
 - (iii) introducing a Worker Code of Conduct as part of the employment contract, and including sanctions for non-compliance (e.g., termination), manual scavenging, engagement with local residents, child labor, nondiscrimination, harassment of coworkers including women and those belonging to SC and STs and other minority social groups, contractors adopting a policy to cooperate with law enforcement agencies in investigating complaints about gender-based violence.
 - (iv) training programs on HIV/AIDS and other communicable diseases,
 - (v) workers' Camp Management Plan addressing specific aspects of the establishment and operation of workers' camps provided the ULB/ Executing Agency is unable to cater to the demand for affordable housing for this additional workforce in terms of rentals, hostels, apartments etc.; and
 - (vi) compliant handling Mechanism at the project level
- Additional measures that aim to reduce incentives to engage with the local community by

providing workers with the opportunity to spend their time off away from the host community, where feasible with a small transport allowance, ideally allowing workers to regularly return for brief visits to their families, spouses and friends, or to visit nearby urban centers that provide a variety of legal social opportunities. For workers who need to travel further it may be attractive to forego weekends off in exchange for longer breaks that would allow for such home leave travel.

Model Code of Conduct (ESHS) for Contractor's Employees and Sub-contractors

This Code of Conduct will oblige all Contractors' Personnel (including sub-contractors and day workers) to abide by following practices, as a minimum. Additional obligations may be imposed during project implementation to respond to particular concerns of the region, the location and the project sector or to specific project requirements. Contractor may also impose any additional or strengthen code of conduct on his workers/ staff.

The Code of Conduct should be written in plain language and signed by each worker to indicate that they have:

- O received a copy of the code;
- O had the code explained to them;
- O acknowledged that adherence to this Code of Conduct is a condition of employment; and
- O understood that violations of the Code can result in serious consequences, up to and including dismissal, or referral to legal authorities.

A copy of the code of conduct will be displayed at prominent locations easily accessible to the community and project affected people. Name and contact number of the authorized representative of the contractor competent to attend the grievances of the local community or project affected persons should also be provided on the display board, in languages comprehensible to the local community, Project Manager's Personnel, and Employer's Personnel.

Measures to be taken for addressing issues related to COVID 19

The COVID-19 pandemic presents unprecedented challenges and that circumstances require a highly adaptive responsive management design to avoid, minimize and manage in this rapidly evolving situation. This section of the ESMF provides guidance to the Borrowers in addressing key issues associated with COVID-19. This section emphasizes the importance of careful scenario planning, clear procedures and protocols, management systems, effective communication and coordination, and the need for high levels of responsiveness.

Key Challenges:

Though the contract will not require big labour camps, still there will be approximately 60 numbers of workers at the peak time. The skilled labour may come from outside the state where as unskilled labour will be largely local. Still, they may need to live in labour camps even though if they return to their homes after work. The camp may also see traffic from suppliers and service providers on regular basis which will have the potential for the spread of infectious disease in projects. Impact on the project workers may lead to additional burden on the local health services which certainly will not be able to take the additional load.

Contractor's Responsibility:

The contract document generally has the clauses for health and safety of the workers but does not cover pandemic situation. In SSCM, the bid documents the contractor will be required:

- ❑ to take all necessary precautions to maintain the health and safety of the Contractor's Personnel
- ❑ to appoint a health and safety officer at site, who will have the authority to issue directives for the purpose of maintaining the health and safety of all personnel authorized to enter and or work on the site and to take protective measures to prevent accidents
- ❑ to ensure, in collaboration with local health authorities, that medical staff, first aid facilities, sick bay, ambulance services and any other medical services specified are available at all times at the site and at any accommodation
- ❑ to ensure suitable arrangements are made for all necessary welfare and hygiene requirements and for the prevention of epidemics
- ❑ to provide health and safety training for Contractor's Personnel (which include project workers and all personnel that the Contractor uses on site, including staff and other employees of the Contractor and Subcontractors and any other personnel assisting the Contractor in carrying out project activities)
- ❑ to put in place workplace processes for Contractor's Personnel to report work situations that are not safe or healthy
- ❑ gives Contractor's Personnel the right to report work situations which they believe are not safe or healthy, and to remove themselves from a work situation which they have a reasonable justification to believe presents an imminent and serious danger to their life or health (with no reprisal for reporting or removing themselves)
- ❑ requires measures to be in place to avoid or minimize the spread of diseases including measures to avoid or minimize the transmission of communicable diseases that may be associated with the influx of temporary or permanent contract-related labor
- ❑ to provide an easily accessible grievance mechanism to raise workplace concerns

Specifically, contractor shall

- ☐ Prepare a detailed profile of the project work force, key work activities, schedule for carrying out such activities, different durations of contract and rotations.
- ☐ Consideration should be given to ways in which to minimize movement in and out of site. This could include lengthening the term of existing contracts, to avoid workers returning home to affected areas, or returning to site from affected areas.
- ☐ Workers accommodated on site should be required to minimize contact with people near the site, and in certain cases be prohibited from leaving the site for the duration of their contract, so that contact with local communities is avoided.
- ☐ Consideration should be given to requiring workers lodging in the local community to move to site accommodation (subject to availability) where they would be subject to the same restrictions.
- ☐ Workers from local communities, who return home daily, should be subject to health checks at entry to the site.
- ☐ Establishing a system for controlling entry/exit to the site, securing the boundaries of the site, and establishing designating entry/exit points (if they do not already exist). Entry/exit to the site should be documented.
- ☐ Training security staff on the (enhanced) system that has been put in place for securing the site and controlling entry and exit, the behaviors required of them in enforcing such system and any COVID-19 specific considerations.
- ☐ Training staff who will be monitoring entry to the site, providing them with the resources they need to document entry of workers, conducting temperature checks and recording details of any worker that is denied entry.
- ☐ Confirming that workers are fit for work before they enter the site or start work.
- ☐ COVID-19 related issues to be part of daily tool box talk such as cough etiquette, hand hygiene and distancing measures, using demonstrations and participatory methods.
- ☐ During tool box talk, reminding workers to self-monitor for possible symptoms (fever, cough) and to report to their supervisor or the COVID-19 focal point if they have symptoms or are feeling unwell.
- ☐ Preventing a worker from an affected area or who has been in contact with an infected person from returning to the site for 14 days or (if that is not possible) isolating such worker for 14 days.
- ☐ Preventing a sick worker from entering the site, referring them to local health facilities if necessary or requiring them to isolate at home for 14 days.
- ☐ Training workers and staff on site on the signs and symptoms of COVID-19, how it is spread, how to protect themselves (including regular handwashing and social distancing) and what to do if they or other people have symptoms.
- ☐ Placing posters and signs around the site, with images and text in local languages.
- ☐ Ensuring handwashing facilities supplied with soap, disposable paper towels and closed waste bins exist at key places throughout site, including entry /exits points, toilet, canteen / mess, drinking water points; worker accommodation; stores; and common spaces. Where hand washing facilities do not exist or are not adequate, arrangements should be made to set them up. Alcohol based sanitizer (if available, 60-95% alcohol) can also be used.
- ☐ Providing cleaning staff with adequate cleaning equipment, materials and disinfectant.
- ☐ Review general cleaning systems, training cleaning staff on appropriate cleaning procedures and

appropriate frequency in high use or high-risk areas.

- ② Where it is anticipated that cleaners will be required to clean areas that have been or are suspected to have been contaminated with COVID-19, providing them with appropriate PPE: gowns or aprons, gloves, eye protection (masks, goggles or face screens) and boots or closed work shoes. If appropriate PPE is not available, cleaners should be provided with best available alternatives.
- ② Training cleaners in proper hygiene (including hand washing) prior to, during and after conducting cleaning activities; how to safely use PPE (where required); in waste control (including for used PPE and cleaning materials).
- ② The Engineer / Project Manager will take in writing from the Contractor of the Measures being taken to address the risks, presented as a contingency plan, as an extension of the existing project emergency and preparedness plan or as standalone procedures.
- ② Contractor to convene regular meetings with the project health and safety specialists and medical staff (and where appropriate the local health authorities), and to take their advice in designing and implementing the agreed measures.
- ② a senior person should be identified as a focal point to deal with COVID-19 issues responsible for coordinating preparation of the site and making sure that the measures taken are communicated to the workers, those entering the site and the local community.
- ② The client may provide support to projects in identifying appropriate mitigation measures, particularly where these will involve interface with local services, in particular health and emergency services.
- ② The grievance redress mechanism set up for the project will have special number only for reporting concerns relating to COVID-19. The number will be widely disseminated and will also be put on the information board at all project sites.
