

Proposed Project Summary for Public Disclosure
(concept review stage)

Project Name	Climate Resilient Electricity Distribution Project
Country	The Federative Republic of Brazil
Type	Non-Sovereign
Area of Operation	Clean Energy & Energy Efficiency
Concept Approval Date	5 July 2026
Total Project Cost	BRL 4,500 million
Proposed Limit of NDB Financing	RMB 675 million
Borrower	RGE Sul Distribuidora de Energia S.A.
Project Entity	RGE Sul Distribuidora de Energia S.A.
Project Context	Pursuant to a long-term concession awarded in 1997 that was extended in May 2026, CPFL RGE provides power distribution services in 381 municipalities in Rio Grande do Sul, covering an area of over 182 thousand km ² and serving 3.1 million customers.
Project Description	The project is structured as climate resilience project and proceeds of the loan will be applied towards distribution infrastructure for improving climate resilience of the electricity grid. The implementation of the Project will help the Borrower to ensure safety of distribution infrastructure and availability of electricity supply to residents and critical institutions (such as hospitals and communication entities) even under adverse weather conditions.
Project Objective	The Project focuses on increase in resilience and efficiency of the distribution network.
